

Užice High School of Economics
31 000 Užice
Serbia

SUBJECT: Letter of Support for Užice High School of Economics Project Application

As one of, if not the most important, Serbian school in our international network, Užice High School of Economics has been a member in good standing of our international Practice Enterprise association for more than 10 years. Their long cooperation and high level of international cooperation would make them an ideal partner for a project involving student mobility and competitions.

Užice High School of Economics has participated in many of our international trade fairs and has been actively involved in student exchanges for the past years. They have multiple mobility connections with other schools and connected through our network to a network of over 2,000 schools across Europe and around the world.

In addition, Užice High School of Economics is an important connection for our school network in Serbia and manages the interconnection to other regional schools from across Serbia and also across the Balkan region. Their partnership in such a project is sure to enhance the outcomes and the opportunities for mainstreaming project results.

These facts lead us to recommend Užice High School of Economics as a dedicated and valuable partner in this project application. Their participation would help ensure the mobility and student connections and ensure the viability of the project outcomes. I would highly recommend this school as a project partner.

With best regards,

Scott Mitchell
Executive Director
